

MODEL: **F8**
REAL 4K, ULTRA-WIDE FOV

**WIDER ANGLE,
LESS DISTORTION**

The advanced 140° horizontal field of view is engineered with cutting-edge software algorithms to minimize distortion. This ensures your photos and videos maintain their natural look, even when capturing expansive scenes.

**ULTRA HIGH DEFINITION
VIDEO RECORDING**

Sharpen your focus on every detail. The high-resolution sensor captures stunning photos and videos with incredible clarity. Users won't miss a thing during the execution of their missions.

IMAGE STABILIZATION

F8 supports the Electric Image Stabilization function, realizing the stability of captured images, and ensuring that important scenes are not lost.

**12+ HOURS
BATTERY LIFE**

If a critical event happens, not having enough battery life left to capture the incident could be devastating, we provide 12+ hours of battery life that supports your full shift.

IP68

IP68 RUGGED DESIGN

This model is designed to withstand various extreme conditions, can be dropped, and is resistant to water or dust.

INTRODUCTION

F8 is the new leap in non-4G body cameras. Building on the exceptional image quality of our previous models, it leverages cutting-edge algorithms to deliver unmatched performance in both hardware and software, allowing users to experience a whole new level of recording capability.

MAIN SPECIFICATIONS

Display	2.0-inch
Video Resolution	3840×2160, 2560×1440, 1920×1080, 1280×720
Video Codec	H.264/HEVC
Field of View	≥ 140°
Image Stabilization	Yes
Pre-event Recording	Configurable
Internal Storage	32GB
Battery	3,450mAh
USB	Type-C
Dust/Water Protection	IP68
