

MODEL: H6

5G TECHNIQUE, THE NEXT GENERATION OF BODY CAM

2K VIDEO RESOLUTION

Capture fine details in complex law enforcement environments, and provide video evidence for law enforcement.

ARTICULATED CAMERA HEAD

Provide users with the option to rotate the screen to the front, which is proven to calm people being recorded. Violent and rude behavior is less likely to occur once they realize they are being recorded on the screen.

ALERTS, LIVE MAPS AND STREAMING

Live video streaming pop-up automatically in IMS when SOS alerts are triggered by a front-line officer, it allows the command center to coordinate tactical operations in real-time with eyes on the ground.

5G NETWORK CONNECTION

Ultra-fast 5G low latency connection provides smooth on-site video.

LONG BATTERY LIFE

More than 9 hours of recording even at the highest resolution.

INTRODUCTION

H6 is a model of the new generation 5G technique combining practical function and exquisite appearance. It continues the functional advantages of the 4G body camera. Designed with an articulated camera body, the screen can be rotated to face forward or backward. Low power consumption results in a battery life of up to 9 hours at 2K video resolution.

MAIN SPECIFICATIONS

Video Resolution	2560×1440, 1920×1080, 1280×720, 864×480
Video Codec	HEVC/H.264
Pre-event Recording	Configurable
Rotatable Camera Head	Horizontal 180°
Field of View	≥120°
Internal Storage	64GB
Battery	3,450mAh
Wireless Connectivity	5G/4G/3G/2G, Bluetooth, WiFi
GPS	Built-in
Display	2.4-inch Touchscreen
USB	Type-C
Dust/Water Protection	IP67
