

# MODEL: M5

## FIREFIGHTER HELMET CAMERA

### DESIGNED FOR INTERIOR FIREFIGHTERS

Built to take on temperatures up to 200°C for short periods, the M5 Helmet Camera is specifically designed for interior firefighters who want to capture incidents for investigation and review after the fire.

### LIVE-VIDEO STREAMING, SOS ALARM

Live video streaming pop-up automatically in IMS when SOS alerts are triggered by a front-line firefighter, it allows the command center to coordinate tactical operations in real-time with eyes on the ground.

### RUGGED DESIGN

The rugged design is capable of handling the harshest of environments. It boasts an IP67 rating, resisting dust, wind, and water submersion for 30 minutes at a depth of 3 feet. Additionally, it is MIL-STD-810G compliant, capable of handling drops, shocks, and vibrations, and will function flawlessly in a wide temperature range.

### BIG BUTTON, EASY TO USE

The big button design is perfect for very thick gloves , allowing firefighters to focus on their crucial jobs.

## INTRODUCTION

The firefight helmet camera is specially designed for firefighters whose working environment is complex and unpredictable. It can be mounted to an MSA Helmet Standard Adaptor using a cradle, allowing the firefighters to free their hands and be more concentrated in an emergency operation in a high-temperature environment.

## MAIN SPECIFICATIONS

Dimension	100×58×26.5mm
Weight	≤190g
Field of View	≥120°
Display	2-inch Touchscreen
Video Resolution	1920×1080, 1280×720
Wireless Connectivity	4G LTE, Bluetooth, WiFi
GPS	Built-in
Battery Capacity	2900mAh
Dust/Water Protection	IP67
Laser/White Light	Built-in
High-Temperature Resistance	Fire resistant to temperatures up to 200°C
