

## MODEL: **X7** THE MOST USER-FRIENDLY 4G BODY CAMERA

### 3.0-INCH TOUCH SCREEN

A larger touch screen improves the operation experience and frees users from the limitation of physical buttons. Local video playback becomes clearer.

### EXTRA LARGE BATTERY CAPACITY

No need to worry about incomplete video evidence due to insufficient battery power. The large removable 4000mAh battery provides a maximized battery life that supports your full shift.

### 2K VIDEO RESOLUTION

Capture fine details in complex law enforcement environments, and provide video evidence for law enforcement.

### ALERTS, LIVE MAPS AND STREAMING

Live video streaming pop-up automatically in IMS when SOS alerts are triggered by a front-line officer, it allows the command center to coordinate tactical operations in real-time with eyes on the ground.

## INTRODUCTION

This isn't just another option – it's a game-changer designed to address your biggest pain point: ease of use. We know how crucial smooth operation can be in the field, so we've equipped the X7 with an extra-large battery to keep you powered up all shifts and a big, intuitive touchscreen that makes capturing evidence a breeze. All these features make X7 one of the most user-friendly 4G body worn cameras on the market.
